

HFSSS

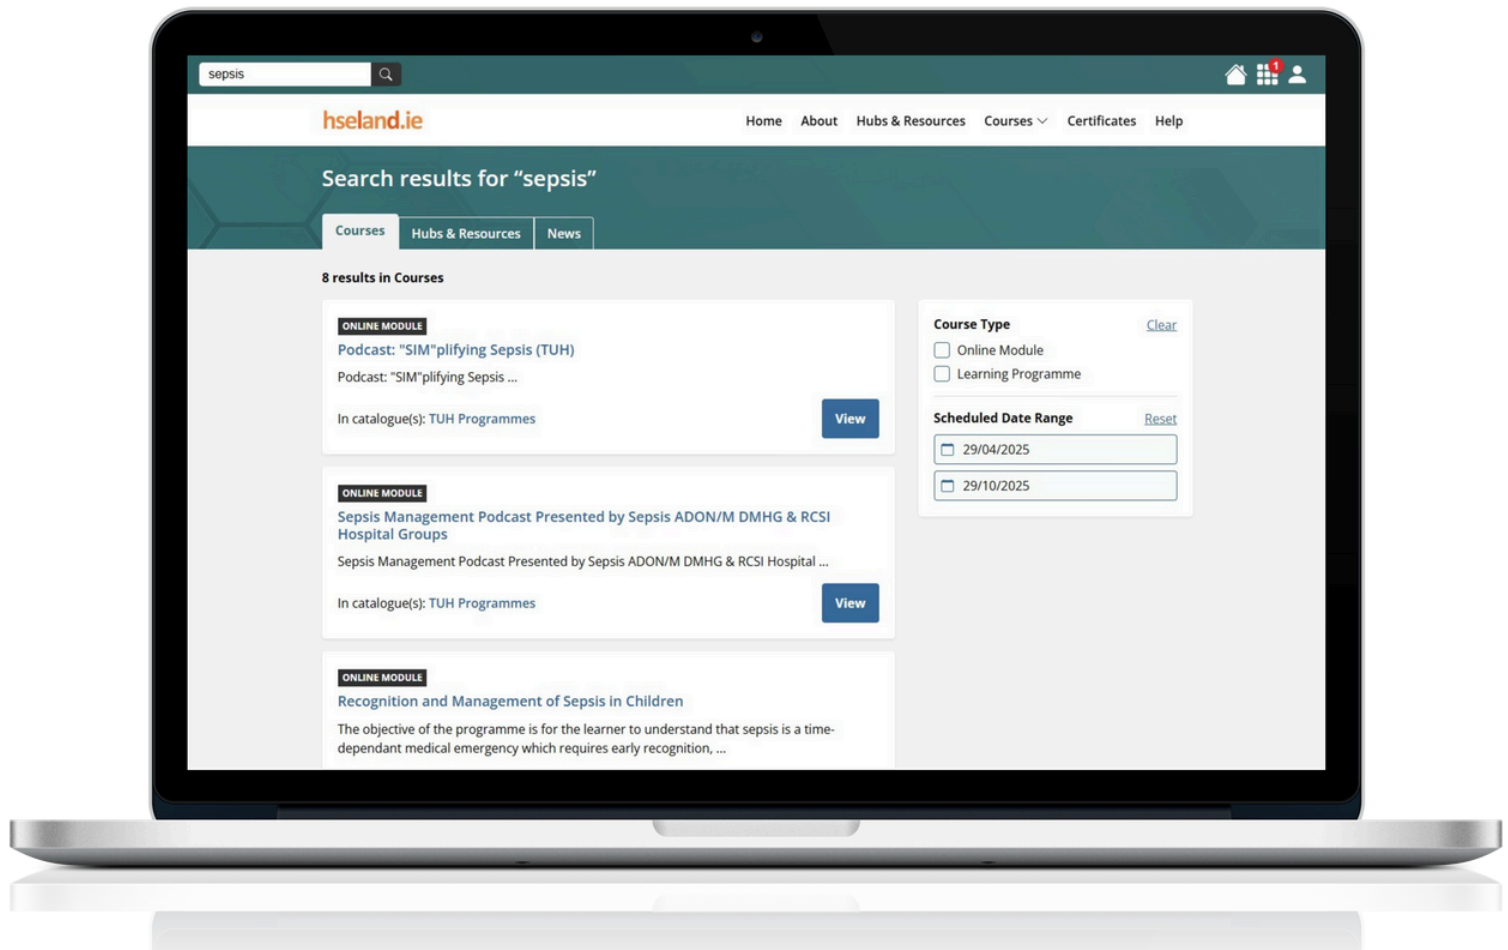

A comprehensive guide to full site sign-on, search and common notification bar (HFSSS) enhancements to HSeLand.

Introduction

This guide outlines the key enhancements to HSeLanD, designed to enhance navigation, security, and communication.

The new features include full site sign-on, enhanced search functionality, a common notification bar and enhanced security measures. Together, these enhancements make it easier to access content, locate information quickly, and stay informed through a central alert system, delivering a smoother, more efficient user experience across HSeLanD.

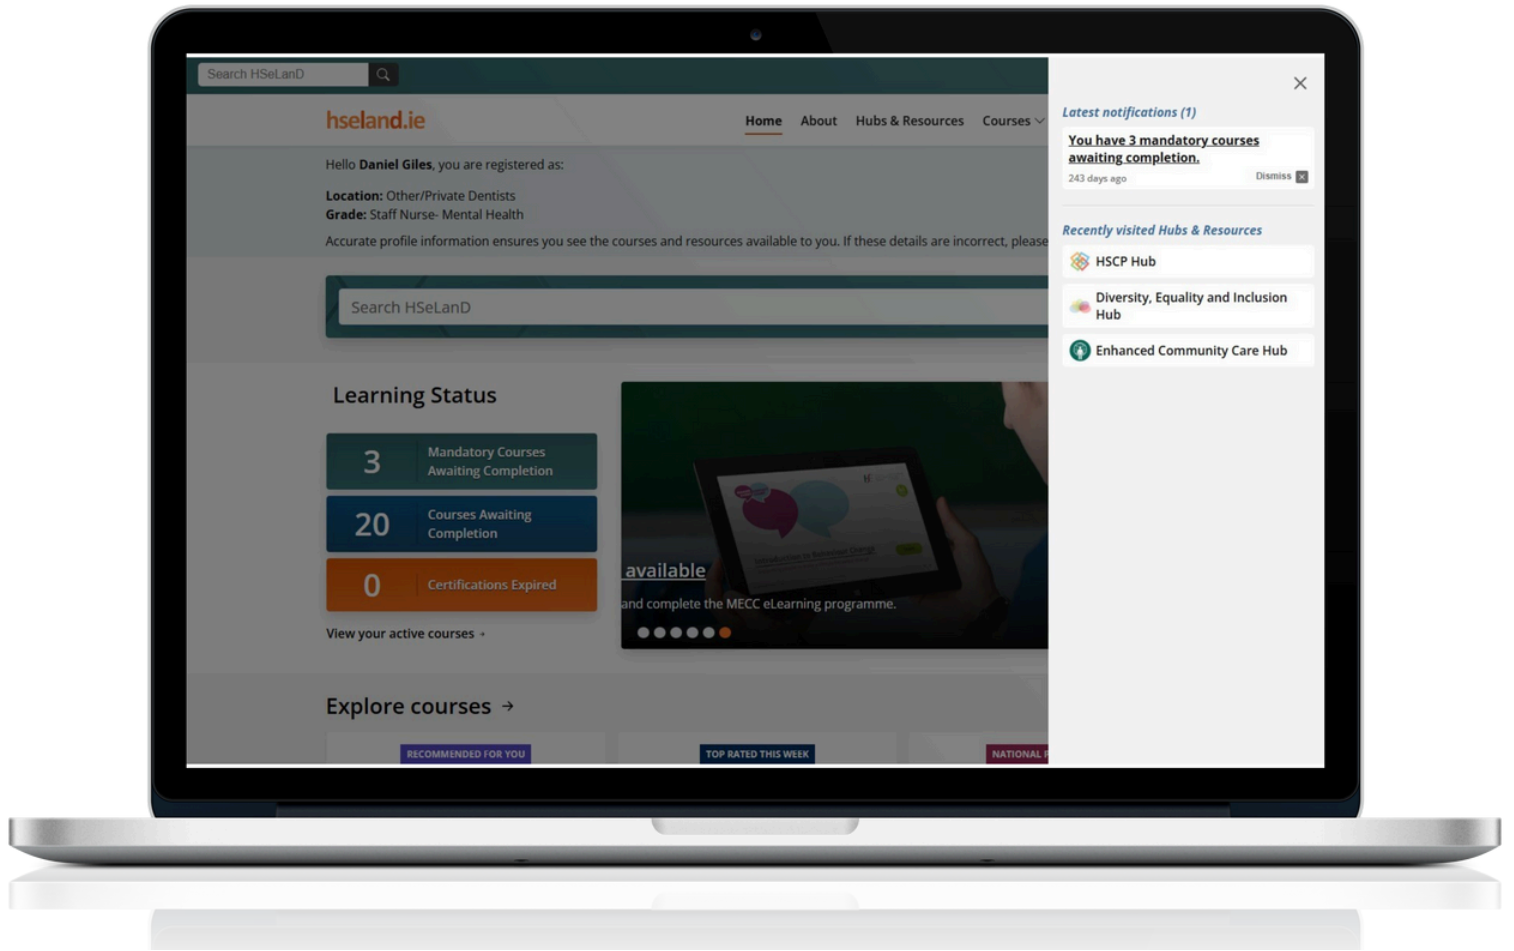

Full Site Sign-On and Search

Full site sign-on allows users to log in once and seamlessly navigate HSeLand. The enhanced search feature enables users to find content across the platform, from learning hubs to on-screen text, resources, and news updates.

- With more detailed search filters, users can tailor search results based on their specific needs.
- Search results are organised by content type, making it easier for users to find exactly what they're looking for.

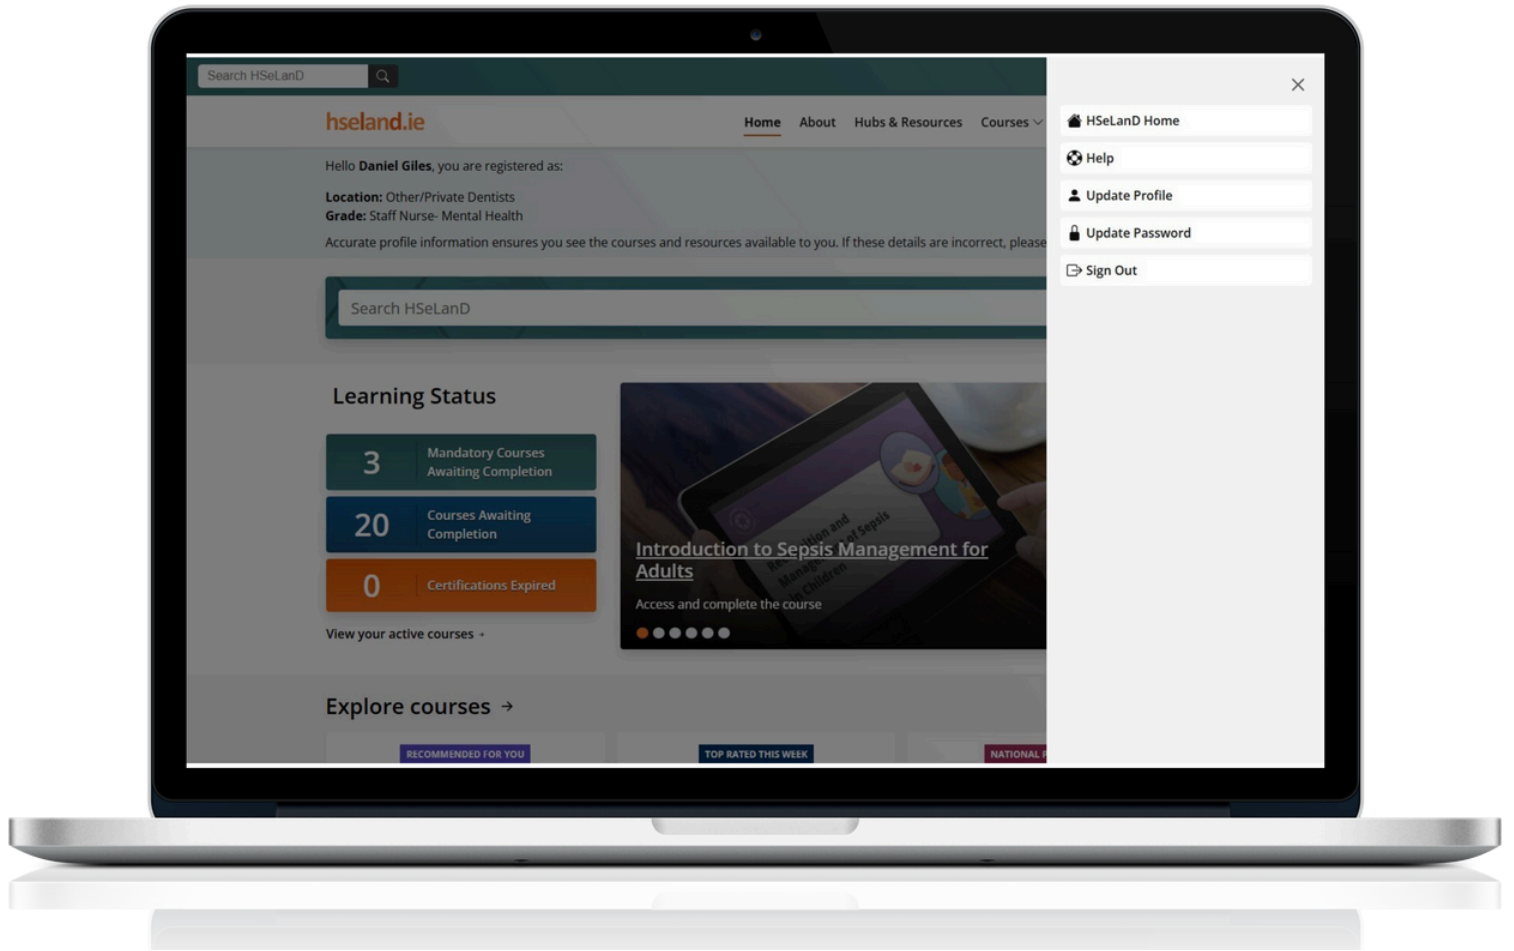

We've introduced a new BETA feature that enables direct linking. While this first version is functional and useful, we've released it as a beta due to upcoming platform enhancements that are needed for its full, long-term integration.

Common Notification Bar

A new Common Notification Bar has been introduced to offer a dedicated space for alerts, updates, and quick access to key features, ensuring a smoother user experience.

This new feature will ensure important notifications, including training reminders, are now more visible.

Security Enhancements

The new single security solution behind HFSSS means that all access points are protected consistently, and stronger password policies help guard accounts against unauthorised access.

As part of the HFSSS enhancements, all HSeLanD users will be required to change their password the next time they log in to www.hseland.ie. Follow the instructions provided via the HSeLanD Support Tool or through the HSeLanD Virtual Assistant, Emily. The HSeLanD Support team is also on hand to help should you need it.
